Connecting mats improves rigidity and security on the worksite

*-dependent on ground conditions

**NZ'S BEST VALUE,
EASY TO USE,
MAN-HANDLEABLE
GROUND PROTECTION SOLUTION!**

Applications

CONSTRUCTION / EARTHMOVING

HEAVY HAULAGE & CRANES

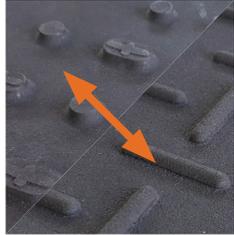

UTILITIES & FACILITIES MAINTENANCE

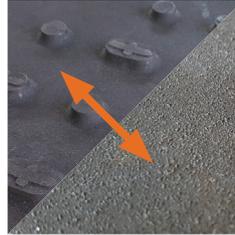

SPORTSFIELD MAINTENANCE

Features

TREAD BOTH SIDES

Tread Both Sides mats feature a bold Chevron grip on one side, and a lower-profile pedestrian friendly tread on the other side for versatility. These mats are best for grass, turf, soil and sand applications where the subsurfaces is soft

SMOOTH ONE SIDE

Smooth One Side mats feature a bold Chevron grip on one side, and a grip-free surface on the other side of the mat. These mats are best for protecting hard but sensitive surfaces such as asphalt, paving stones, sportstracks and fine turf.

COMFORTABLE HANDLE GRIP

All ProtectaMats feature 6x designed handle that have been ground into the mat. Each handle has smoothed corners enabling gloveless handling if required.

TOP QUALITY, MADE IN EUROPE

ProtectaMats are made in Southern Europe. Utilising the best compression moulding technology available, these mats are designed for industrial use and are made to last.

CONNECTION OPTIONS

A range of connection options are available to purchase or hire. Connectors help to stabilise your trackway and also aid in improving site security, especially for long-term projects.

SC2 Two-Way Connector

SC4 4-Way Connector

FF Fast Fit Connector

Material	100% recycled HDPE (High Density Polyethelene)
Manufacture Process	Compression moulded, sandblasted
Maximum Stack Height	50 mats
Other Properties	Chemically Inert, non-conductive

Perfect for the job. They are protecting heritage tree roots while we track around on diggers. Being able to move them by hand is great, and they have some integrity to them - they spread the weight of the excavator well. They work well and the client is happy - a good product!
